SUMMARY:

As a Data Scientist with a strong foundation in data analysis, machine learning, and AI-driven model development. I specialize in building intelligent systems to solve real-world problems. My expertise includes Reinforcement Learning (RL), Agent Systems, Data Analytics, Machine Learning and Large Language Models. I am particularly interested in deep learning, computer vision LLMs for intelligent decision-making and automation. Seeking a challenging role where I can apply my 3 years of academic experience to deliver actionable insights and innovative solutions. I am eager to contribute to real-world problem-solving and technological advancements.

PROFESSIONAL SKILLS:

Programming Languages

Python, R, SQL, Java, Html , CSS, JavaScript

Database Management:

MySQL, MongoDB, PostgreSQL

Machine Learning & AI:

Supervised & Unsupervised Learning ,
LLMs,Transformer Models, GPT-based Architectures
NLP (Basic Understanding) Model Development & Evaluation

Data Analysis & Visualization:

Pandas, NumPy, Matplotlib, Seaborn, PowerBI

Statistical Analysis and modeling:

Hypothesis Testing, Regression Analysis, Time Series Analysis

Tools & Frameworks:

PyTorch, FastAPI, TensorFlow,Streamlit, Colab, D3.js

PROFESSIONAL EXPERIENCE:

National Development Complex /Intern

NDC Islamabad- August 2024 - October 2024

EDUCATION:

Bachelor's Degree in Data Science -February 2022 - Present

COMSATS University Islamabad

CGPA: 3.67

PROJECTS:

CodeForge AI: Developed an AI-driven code analysis tool leveraging LLMs for bug detection, static analysis, and test case generation with a FastAPI backend.

Neural Machine Translation for Date Normalization: Built a Seq2Seq model with Attention Mechanism to convert human-readable dates using PyTorch.

LLM-Powered Multi-Agent Collaboration Framework: Developed a framework where LLMs enable agent communication and decision-making in business simulations.

Automated Agent for Data Visualization with LLM and D3.js using FastAPI: Created an automated data visualization system combining LLMs, D3.js, and FastAPI for real-time insights.
